# SIMPLY IMPRESSIVE

CLOUTH® MASTER SEALS SOLO  
The durable holder for quick  
sealing strip replacement

## Your new efficiency miracle

With our CLOUTH® MASTER SEALS SOLO, we offer you a cost-effective way to optimally utilise the savings potential of raw materials and working materials.

**The CLOUTH® MASTER SEALS SOLO combines optimum process characteristics with maximum efficiency.**

The holder consists of our POLICLOUTH-SUPER®, which has been tried and tested for decades. The superfine glass fibre fabric with epoxy resin system guarantees high elongation at break and elastic energy absorption – combined with excellent chemical corrosion resistance.

These properties make the CLOUTH® MASTER SEALS SOLO particularly durable.

The holder was developed exclusively for our CLOUTH®-SEAL sealing strips, which can be easily inserted and locked in place with two screws.

The paper web is optimally supported during release from the drying cylinder by a targeted vacuum.

CLOUTH®-SEAL sealing strips

## UNBEATABLE DUO FOR MAXIMUM SYSTEM AVAILABILITY

### CLOUTH® MASTER SEALS SOLO

- Cost-effective
- Saves resources
- Material proven over many years
- Strong chemical corrosion resistance
- Optimised for mechanical stresses
- Virtually maintenance-free

### CLOUTH®-SEAL SEALING STRIPS

- Excellent sealing properties
- Non-abrasive, slippery material
- Gentle on the dryer fabrics
- Very durable
- Easy to install
